

Project Demo Planning

Date	8 July 2026
Team ID	
Project Name	Smart Agricultural Production Optimization Engine
Maximum Marks	1 Marks

Project Demo Planning

This document outlines the demonstration plan for the **Smart Agricultural Production** project. The demo is structured to clearly present the problem addressed by the project, explain the proposed solution, demonstrate the application's key features, and answer questions from the evaluators. The demonstration ensures that all implemented functionalities are showcased in a logical and organized sequence.

Demo Planning

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, objectives, and the agricultural problem being addressed.	2	Team Member 1 (or Your Name)
2	Solution Overview	Explain the system architecture, technology stack, and project workflow.	2	Team Member 2 (or Your Name)
3	Live Application Demonstration	Demonstrate the home page, crop recommendation form, input validation, and prediction result.	5	Team Member 3 (or Your Name)
4	Machine Learning Explanation	Briefly explain the dataset, trained model, and prediction process.	2	Team Member 4 (or Your Name)
5	Testing & Results	Present functional testing, performance testing, and output screenshots.	2	Team Member 5 (or Your Name)
6	Conclusion & Future Scope	Summarize the project and discuss possible future enhancements.	2	Team Leader (or Your Name)

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the challenges in crop selection and the motivation behind the project.
2	Solution Overview	Describe the architecture, technologies used, and overall workflow.
3	Live Feature Demonstration	Demonstrate the application by entering sample agricultural parameters and showing the recommended crop.
4	Q&A Session	Answer evaluator questions related to implementation, machine learning model, testing, and future improvements.
